

FRONTEND DEVELOPER

A software developer with a strong passion for web development, particularly in frontend. Who likes to spend his spare time reading technical articles and consistently strive to learn new technologies. Over the past three years, honed my technical skills and currently seeking a junior position to enhance my abilities further. I am eager to join a dynamic team that shares a passion for continuous learning and growth.

TECHNICAL SKILLS

Core	: HTML, CSS, JavaScript [ES7], TypeScript
Frameworks	: React.js, NextJs
Libraries	: Redux, Redux Toolkit, Zustand, React Query, Axios, React Router, MaterialUI, ShadCN
Styling Tools	: Tailwind, Bootstrap
Version Control	: Git, GitHub

EXPERIENCE

Frontend Developer <i>LeadsMart</i>	Jan 2025 – Present <i>Heliopolis, Cairo, Egypt - Full-Time</i>
<ul style="list-style-type: none">Spearheaded UI/UX migration project, translating Figma designs into functional React components with pixel-perfect precision while maintaining design system consistencyEngineered complex frontend logic and state management solutions to enhance application performance and user experienceCollaborated within an Agile development team, utilizing Jira for task management and Bitbucket for version control to deliver features on schedulePartnered with UX designers to conduct design reviews, propose improvements, and ensure optimal usability standards throughout the application	
Frontend Developer <i>Lnkr</i>	Oct 2024 – Nov 2024 <i>Remote - Part-Time</i>
<ul style="list-style-type: none">Developed dynamic and interactive (SaaS) tools and insights for healthcare providers and insurance companies using ReactIntegrated and managed API endpoints in React applications, ensuring efficient data fetching and handling through libraries like Axios and React QueryActively collaborated on resolving GitHub issues, providing effective solutions and engaging in discussions to clarify and understand feature requirements when necessary	
Frontend Developer <i>Big Data Egypt For Systems</i>	Dec 2023 – Jan 2025 <i>Nasr City, Cairo, Egypt - Full-Time</i>
<ul style="list-style-type: none">Designed and implemented a ticketing system for printer maintenance, optimizing workflows and centralizing task and resource management.Developed a complete CMS from concept to implementation, transforming an initial idea from the manager into a functional design and responsive frontend, delivering a practical and user-friendly solution.Implemented a SPA structure for a seamless and efficient user interface.Created a comprehensive system architecture and user flow to ensure optimal functionality and user experience.	

PROJECTS

Weather App	<i>React.js, Redux, Axios, Tailwind</i>	Source Code
<ul style="list-style-type: none">Converted Figma design into responsive weather app with React and Tailwind CSS, ensuring better cross-device experience.Integrated Redux Tool Kit to manage real-time weather data flow, optimizing storage for current and 5-day forecasts.		

- Utilized **responsive design** to ensure compatibility across all devices
- Leveraged React Hooks, specifically for data fetching with Axios, to optimize API calls and maintain a dynamic user interface.

Movies App

React.js, AOS, Tailwind

[Source Code](#)

- **Developed a responsive movie application** using React, showcasing a dynamic interface for browsing, searching, and exploring movie details.
- Implemented state management for seamless user interactions and efficient data rendering.
