Professional Summary

Frontend Engineer with 3+ years of experience building production SaaS platforms, dashboards, and operational tools using React and Next.js. Specialized in scalable component architectures, complex data interfaces, and responsive UI systems integrated with modern backend services. Experienced in delivering full product features including backend services using Supabase for database design, authentication, and storage.

Core Skills

Frontend Development: React.js, Next.js, React Native, Expo, TypeScript, JavaScript (ES7+)

State & Data Management: React Query, Redux Toolkit, Zustand, REST APIs, Axios

Backend & Data: Supabase (PostgreSQL, Authentication, Storage, Realtime APIs)

UI Systems: Tailwind CSS, Material UI, ShadCN, Bootstrap, Radix UI

Architecture: Component-driven architecture, feature-based folder structure, reusable UI systems, custom React hooks

Data Visualization: Analytics dashboards, operational reporting interfaces, Chart.js

Tools & Workflow: Git, GitHub, Bitbucket, Jira, Agile/Scrum, Figma collaboration

Professional Experience

Frontend Developer | LeadsMart

Jan 2025 – Present

Heliopolis, Cairo, Egypt

- Redesigned the product frontend, converting Figma designs into scalable React components and reusable UI modules.
- Developed interactive dashboards and operational interfaces for managing leads and analytics workflows.
- Implemented state management using Redux Toolkit and Zustand to simplify complex UI state logic.
- Developed the company mobile application using React Native and Expo ensuring feature parity with the web platform.
- Collaborated with backend engineers within Agile workflows to deliver continuous product improvements.

Frontend Developer | Lnr

Oct 2024 – Nov 2024

Remote

- Developed SaaS dashboards for healthcare operations using React and Tailwind CSS.
- Integrated APIs using React Query and Axios with caching and mutation tracking.
- Collaborated in a remote team environment using GitHub workflows and code reviews.

Frontend Developer (Full-Stack Responsibilities) | Big Data Egypt for Systems

Dec 2023 – Jan 2025

Nasr City, Cairo, Egypt

- Designed and developed a ticketing platform used by maintenance engineers to track machine repair workflows.

- Implemented backend services using Supabase including PostgreSQL schema, authentication, and API integrations.
- Built role-based dashboards for operators, engineers, and managers to manage service workflows.
- Created a PDF reporting system using Supabase Storage for machine maintenance documentation.
- Defined scalable frontend architecture and reusable component structures supporting long-term product expansion.

Projects

Maraqez – Educational Center Management System

React • TypeScript • Vite • React Query • Zustand • Tailwind CSS

- Developed a full RTL Arabic SPA for managing students, teachers, exams, payments, and educational groups.
- Implemented QR-code attendance scanning with JSQR and payment validation warnings before student check-ins.
- Built reusable data grids using TanStack React Table with filtering, sorting, and pagination.
- Developed real-time dashboards displaying student metrics, revenue analytics, and operational activity.

Printer Maintenance Ticketing Platform

React • TypeScript • Supabase • Material UI

- Built a ticketing system used by engineers to track machine maintenance and service requests.
- Implemented machine lifecycle statuses including solved, spare-parts, and scrapped.
- Designed backend services using Supabase including database schema and document storage.
- Developed structured workflows for uploading maintenance reports and updating ticket status.

Education

University of Damietta

2018 – 2022

Bachelor's Degree in Accounting (English Section)

Courses

- [The Ultimate React Course — Jonas Schmedtmann](#)
- [The Web Developer Bootcamp — Colt Steele](#)

Languages

Arabic: Native

English: Upper-Intermediate (B2)
