

Ahmed Sultan

Frontend Engineer | React, TypeScript, Next.js, React Native

Cairo, Egypt | +20 111 123 6361 | asultan.dev@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience delivering production B2B SaaS, analytics dashboards, and cross-platform web/mobile products with React, TypeScript, Next.js, and React Native. Builds scalable component systems and data-intensive workflows integrated with REST APIs, Supabase/PostgreSQL, and role-based access control. Shipped bilingual English/Arabic products, tactical data visualizations, offline workflows, and performance improvements across advertising, sports analytics, healthcare, and field-service operations.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, React Native, Expo, HTML5, CSS3, Vite

State & Data: TanStack Query (React Query), Redux Toolkit, Zustand, REST APIs, Axios, IndexedDB, Dexie

UI & Visualization: Tailwind CSS, Material UI, Radix UI, Shadcn UI, D3.js, Recharts, Chart.js, responsive design, RTL/i18n

Backend & Cloud: Supabase, PostgreSQL, Authentication, Row Level Security (RLS), Storage, AWS S3, Cloudinary

Quality & Workflow: Vitest, Playwright, Storybook, ESLint, Git, GitHub, Bitbucket, Jira, Agile/Scrum, Figma

PROFESSIONAL EXPERIENCE

Frontend Developer | LeadsMart | Full-Time

Jan 2025 - Present | Heliopolis, Cairo, Egypt

- Rebuilt an advertising and lead-generation SaaS frontend from Figma as a scalable React and TypeScript SPA, establishing reusable components and feature-based architecture.
- Delivered Facebook and TikTok campaign creation, lead management, analytics, billing, wallet, and template workflows for advertisers and internal operations teams.
- Implemented role-based access control (RBAC), permission-gated routes and navigation, and bilingual English/Arabic interfaces with right-to-left (RTL) support.
- Improved resilience and performance with TanStack Query caching, Zustand, IndexedDB/Dexie offline lead updates, lazy-loaded product surfaces, and targeted performance refactors.
- Shipped a React Native and Expo companion app and shared cross-platform TypeScript modules to align core web and mobile product flows.

Frontend Developer | TactiSport | Part-Time

2025 - Present | Remote

- Designed and built an end-to-end multi-role B2B SaaS portal for AI-powered football analytics, including route-level protection and granular RBAC across five client, operator, and admin roles.
- Engineered a custom tactical pitch renderer and 12+ interactive reports with D3.js and Recharts, covering formations, movement relations, pressure, possession, zone pathways, and full-match analysis.
- Developed report and video ingestion workflows with bulk ZIP uploads, AWS S3 presigned multipart uploads, Cloudinary integration, and client-side full-match aggregation across report segments.
- Shipped a React 19/Vite portal and localized Next.js landing experience in English and Arabic with RTL; improved runtime performance through code splitting, request deduplication, JSON caching, and offloaded aggregation.

PROFESSIONAL EXPERIENCE (CONTINUED)

Frontend Developer (Full-Stack Responsibilities) | Big Data Egypt for Systems | Full-Time

Dec 2023 - Jan 2025 | Nasr City, Cairo, Egypt

- Architected a React and Supabase field-service ticketing platform used by managers, operators, and engineers across clients, branches, and machine inventories.
- Designed PostgreSQL data models and Supabase services for authentication, Row Level Security, RPC-based ticket assignment, document storage, and operational APIs.
- Built end-to-end workflows for ticket lifecycles, scheduled maintenance visits, machine hierarchy, engineer activity, and spare-parts tracking.
- Automated maintenance documentation with PDF reporting and Supabase Storage, and added Excel migration tooling with validation for operational data.

Frontend Developer | Lnr | Part-Time

Oct 2024 - Nov 2024 | Remote

- Developed responsive healthcare SaaS dashboards with React, TypeScript, and Tailwind CSS.
- Integrated REST APIs with TanStack Query and Axios, implementing caching, mutations, loading states, and error handling in a remote code-review workflow.

SELECTED PROJECT

Maraqez - Educational Center Management System

React | TypeScript | Vite | TanStack Query | Zustand | Tailwind CSS

- Built an Arabic-first RTL single-page application for students, teachers, exams, payments, educational groups, and operational reporting.
- Implemented QR-code attendance scanning with payment-status validation, plus reusable TanStack Table grids with filtering, sorting, and pagination.
- Delivered real-time dashboards for student metrics, revenue analytics, and day-to-day center activity.

EDUCATION

Bachelor's Degree in Accounting (English Section) | University of Damietta

2018 - 2022

PROFESSIONAL DEVELOPMENT & LANGUAGES

Courses: The Ultimate React Course (Jonas Schmedtmann); The Web Developer Bootcamp (Colt Steele)

Languages: Arabic (Native); English (Upper-Intermediate, B2)
